Subj ct: One other request...

For the same application, 09/904,968 could you please align the SEQ ID NOS: 3,4,19, and 20 with SEQ ID NO:1 from the same application?

Could you please return these results to me on disk?

Thanks Barb,

Sally Sakelaris

Subject: "heard it thru the grapevine"

I was hoping I could get in on the quick seq search action?

Could you please perform a "mer" search for the following sequence: ctgcccaccc cttcccgcc

I need at least 10 nucleotides consisting of the bolded "c"
against all nucleic acid databases?

I am not sure what you would suggest as the best search, alternatively this polymorphism("c") is at
nucleotide 3110 in SEQ ID NO: 1 from 09/904968.

Thanks so much,

Sally Sakelaris
